RL status	P1	P1	P2	-	P2	-	-	*	-	*		*	-	-

On the 1-9 scales, high figures indicate that a variety shows the character to a high degree (e.g. high resistance)

UK = recommended for the UK

[] = limited data

P1 = first year of recommendation

P2 = second year of recommendation

LSD = least significant difference

Average LSD (5%): varieties that are more than one LSD apart are significantly different at the 5% confidence level

† Lennon is a naked variety that is not eligible for recommendation

C = yield control (for current table)

* = variety no longer in trial
